

# 74A SERIES

## Single Cartridge Housing

The **74A Series** single cartridge housing is available for elements up to 30" long. The plenum style configuration is ideally suited to both liquid and gas processes for pressures up to 10 bar g.

Mounted inline, this plenum styled housing will suit processes where there is a need to allow easy access to all internal areas, therefore assisting in the general cleanliness of the process system in which the filter is to operate. Having no loose internal components ensures easy and fast clean down procedures.

The **74A Series** housing will accept the Single Open End Code 7 cartridge with nominal lengths of 5, 10, 20 and 30".

### Product Features

- Inline style construction with optional specification finish
- Cast Vee clamp closure for ease of access
- Option screw clamp closure using DIN coupling
- No loose internals for trouble free operation
- Easy drain plenum feature for gas applications
- PED and ATEX compliant
- CE Marked

## Features and Benefits

- Standard single open end cartridge fitting, using the Bayonet lock code 7 for forward and reverse flow
- 316L construction for maximum corrosion resistance.
- Every housing is etched with a serial number for full traceability.
- Wide range of options available for connection size, style and cartridge lengths.
- Full certification available, PED and ATEX compliant, CE Marked

## Product Range

Amazon Filters design and manufacture an extensive range of liquid filtration systems, providing one of the widest selections of filtration vessels, depth filters and pleated cartridges available today, ensuring excellent process and filter compatibility. As one of Europe's leading manufacturers of filtration systems, Amazon Filters is able to offer a solution to meet all filtration requirements. Amazon's filters are manufactured in clean room conditions and all products come with detailed Product Validation Guides and Technical Support documentation.
